

## Additional Databases and Hardware

### Preventative Maintenance Database

Preventative Maintenance is essential for recommending due services to customers. This database works side-by-side with the Service Review to help upsale services and items.

### VIN Database

Speed up ticket entry by automatically populating the Year, Make, Model and Engine Type from the vehicle's VIN code. Pair this with the handheld scanner for a speedy checkout!

### Additional Databases

- Fuel Filter Database
- Cabin Air Filter Database
- Serpentine Belt Database

### Oil Light Reset

No more flipping through pages and pages to find the Oil Light Reset information for a vehicle. You can now easily view the Oil Light Reset information, with diagrams, from the main ticket screen.

### Accounting Integration

Our built-in tool allows you to export data to your third-party accounting software. eLube supports several of the most popular accounting packages on the market.

### USPS Address Verification

No more spelling errors or wasted reminder card mailings! Verify all your customer addresses with the USPS national database.

### Fingerprint Reader

Fingerprint technology can be used to increase the security in your shop. It can be used to clock employees in / out, be sure the correct person is voiding tickets, adjusting the inventory, reprinting invoices, and many other uses!

### Credit Card Reader

You can now swipe a customer's credit card during checkout, eliminating the use of an outside credit card machine and providing high-speed credit card authorization. Don't forget about the time saved when reconciling your cash drawer!

### Verifone Pin Pad

The Verifone Pin Pad can be used to quickly process Debit Cards at checkout. The Pin Pad is easily configured and fully integrates with the eLube software.

### Signature Pad

The signature pad allows an employee to digitally capture a customer's signature during the checkout process. This can save paper and improve your professional looking store.

### Basic Scanner

The handheld scanners allow an employee to scan a vehicle's VIN code, which will automatically populate the Year, Make, Model and Engine.

### Deluxe Scanner

The handheld scanner operates as a full-featured workstation. It can scan vehicles, print work orders, static stickers, and service reviews. Adjust and count inventory and acquire signature directly on screen!
